The video shows Jalen practicing his leaping, feeding through four multiple leaps on the Precision leap, each landing pretty closely to the mark after a minimum 6 meter height marker.

On his fifth jump, he vaults from the ground and flies off the ground, slamming into the ceiling of the facility, which is 94 meters above the leap point. He is immediately unconscious and his body slams into the ground violently.

Fast forward to security and medical staff coming to his aid. He appears to be deceased.
